

GSM/GPRS-Controller

Features

- Module for switch sockets
- GSM/GPRS-Interface
- Remote control of switch sockets

Overview

The GSM/GPRS-Controller is a microcontroller module, consisting of a board and a GSM unit. It can be used as an extension card for our product "GSM-Switch-Rail" and enables a comfortable configuration of the switch via internet or mobile phone.

Details

GSM/GPRS-Controller

Controller	ARM7 Processor
USB	HS USB 2.0, microUSB
Power	5V-30V
Board Size	62mm x 40mm
Temperature Range	-10°C - +70°C
