

PLC-USB-Adapter

Features

- USB over standard AC Powerlines
- Supports USB 1.1 and USB 2.0 devices
- Plug-and-play
- No drivers required

Overview

Thanks to the PLC-USB-Adapter, you can transform any of the sockets in your house into an USB port. This permits a simple network communications of USB devices using AC power line.

You only have to plug the adapter into the socket and then connect the standard USB device. Immediately you can control the connected devices from any PC in the circuit.
