

piBike-Lock

Important characteristics

- Innovative fleet management and access solution for bicycles and bike sharing systems
- Smart bicycle frame lock with Radio allows a bike release by app
- Internet portal allows management and location of bicycles
- Ideal solution for:
 - Individuals
 - Companies
 - Public transport, cities and communities
 - Rental systems

Overview

piBike-Lock consists of three components: an adapted AXA bicycle lock with a Radio interface, an iOS or Android app and an internet portal www.pironex-portal.de

A simple (location, theft protection and access authorization) and an advanced fleet management (manage a sharing system in real time) can be realized.

Technical specifications
